MONACO TELECOM LAUNCHES EUROPEAN CLOUD PLATFORM AGREEMENT

Monaco Telecom, Cable & Wireless Communications' Monaco business, has been chosen to securely host a cloud-based platform which will deliver services to non-competing telecom operators across Europe.

The CAFÉ Cloud solution is provided by Movius Interactive Corporation, a global provider of applications for telecom service providers. Movius already operates the CAFÉ Cloud platform in the United States. Monaco Telecom's secure data centre facilities will host services for the product's expanding European client base.

CAFÉ Cloud is expected to appeal to Europe's smaller fixed line and mobile operators who want to reduce fixed IT costs and management complexity by implementing new applications for their customers through the internet ('the cloud'). Software delivered via the cloud (known as 'software as a service') is rented as a managed service which can help customers to reduce the cost of licences and IT support staff.

Services offered to CAFÉ Cloud customers will include Visual Voicemail - which delivers messages from a customer's fixed and mobile accounts to their smartphone - and myIdentities - which allows users to host their personal and business accounts on a single smartphone.

Martin Péronnet, CEO of Monaco Telecom, said:

"For all operators it is integral to supply a constant stream of new and innovative applications. Providing these services via the cloud is the perfect solution to ensure agility, cost efficiency and maximum potential and we are pleased to be at the core of this transition in Europe."

Dominic Gomez, CEO of Movius, said:

"Monaco Telecom is at the cusp of business model innovation by providing a hosted Value Added Services platform to non-competing operators. Now operational, other operators can benefit from economies of scale, Monaco's market knowledge and experience as well as CAFÉ's application enablement features."

About Cable & Wireless Communications

Cable & Wireless Communications is a global full-service communications business. We operate leading communications businesses offering mobile, broadband and domestic and international fixed line services in most of our markets as well as pay TV, data centre and hosting, carrier and managed service solutions. Our operations are focused on providing our customers - consumers, businesses, governments - with world-class service. We are the market leader in most products we offer and territories we serve. For more information visit www.cwc.com.

About Monaco Telecom

Monaco Telecom is Monaco's only full service telecoms operator and is strongly committed to providing residents of the Principality with the latest services and high quality customer service. We are owned by Cable & Wireless Communications (49%) and the Government of Monaco (45%). The final share of the company (6%) is held in trust by the Compagnie Monégasque de Banque.

In Monaco we are the leading provider of mobile services and sole provider of fixed line, broadband and pay TV.

Our international strategy is to work with partners to build high quality mobile, broadband and satellite services in emerging markets and the Mediterranean region. We have successfully partnered with national mobile operators in Kosovo and Afghanistan to provide network infrastructure and operational support (GSM, data, international voice, management of traffic and roaming, specific country code).
